AI A + 商品详情页

AI A+ Detail Page Generation

仅需一张单品原图，AI 自动生成整套电商 A + 详情页面，包含模特上身、细节拆解、多场景使用、规格参数等板块，一站式完成商品电商视觉包装，大幅缩短美工制作周期。

With just one product image, AI automatically generates a complete e-commerce A+ detail page, including model wearing shots, detail breakdowns, multi-scene application and specification modules. It realizes one-stop commercial visual packaging and greatly shortens design cycle.

Ai 服饰（平铺图）上身

AI clothing (flat lay) on top

对服饰单品平铺素材进行组合搭配，一键生成模特实景上身效果图，轻松实现单品多场景、多风格穿搭演绎，高效完成一衣多搭的视觉方案输出。

Combine flat-laid clothing items to generate real-model wearing renderings with one click. Easily create diverse styling schemes for a single garment and efficiently produce multi-scene visual matching solutions.

AI 服装提取平铺图

AI head and face swapping

Extract clean flat-lay apparel images from model wearing shots or physical clothing photos, remove redundant elements such as figures and backgrounds, and generate standardized e-commerce flat product pictures efficiently.

从模特上身图、实物实拍图中剥离服饰主体，去除人物、杂乱背景等多余元素，快速生成规整干净的服饰平铺商品图，节约服装拍摄与修图成本。

Ai 参考虚拟模特

AI Accessory Virtual Model Rendering

以包包单品平铺图为参考，将配饰自然融入人物场景，生成氛围感真人模特上身效果图，快速演绎配饰穿搭氛围，丰富单品展示视觉。

Take flat-laid bag accessories as reference, naturally integrate accessories into character scenes, generate atmospheric real-model wearing renderings, quickly interpret matching styles and enrich product display visuals.

虚拟模特换成图

基于 ComfyUI 工作流，单品配饰一键植入人物画面，自动生成协调自然的模特佩戴成片，高效完成配饰场景化出图。

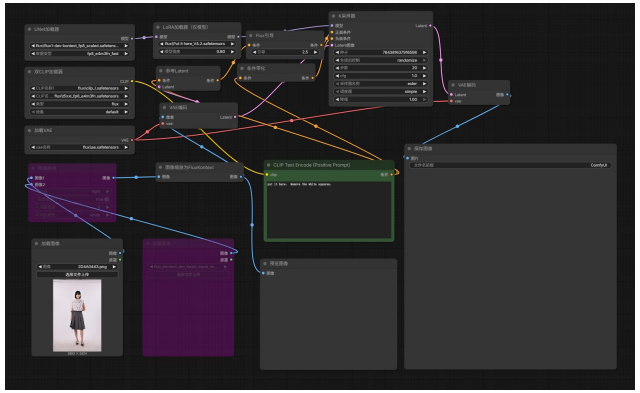

AI 换头换脸

AI head and face swapping

Select the model's face and replace the amateur's face with the model's face, greatly saving time and costs.

AI 换背景

AI background change

First, use AI to generate one or more satisfactory background images. Then, capture the model's pose, and use the two images for blending, replacing the background.

Ai 集成网站

AI Integrated Website

统筹协调各部门的 AI 应用需求。通过设计和落地标准化 AI 工作流，成功赋能同事，显著提升了工作效率。同时，主导开发并上线了内部 AI 工具网站，极大降低了同事使用 AI 的门槛。

Ai 文本知识库搭建

AI Text Knowledge Base Construction

构建文本知识库，将 AI 系统进行分组，使其能基于知识库开展分组识别，并调用运用已有知识库资源，以此实现更精准地生成对应文本。

Build a text knowledge base and group AI systems so that they can perform group identification based on the knowledge base and utilize existing knowledge base resources, thereby achieving more precise generation of corresponding texts.
